## OVERVIEW

Decision making is a science and UCSF approach to business is embedded with strong principles of management, business and taking marketing one-step further by encompassing entrepreneurship.

In this new era where businesses are cutting across boundaries, the business professionals of today need to be dynamic, adaptive and creative. In this programme, students will be taught the basic business acumen such as ways to analyse data, interpret facts and deduce judgement based on evidences or foreseeable trends. We believe business is both an art and science. Therefore, our philosophy in business is that successful businesses must embed good solid management practices with the ability to identify trends, opportunities and materializing ideas.

The programme also equip students with multi-faceted skills which will allow them to assume many different roles in the business world. Hence, irrespective of your educational background, whether it is from art, commerce or science, our
